HOW TO DO A PING TEST(WINDOWS 8)

⇒ Move the mouse to the upper right-hand corner of the screen to make the vertical menu bar appear, Click Search

⇒ Type "**cmd**" in the **search** bar and hit the **Enter** key on your keyboard

Search	
Everywhere 🗸	
cmd	P

- A black box with a flashing cursor will open; this is the Command Prompt. Type **ping hostname** or **ping IP address** and press **Enter**
- A **hostname** is typically a website address. Replace *hostname* with the website that or server that you want to ping. For example, to ping google.com, type ping www.google.com
- An **IP address** is a computer's location on a network, either locally or on the internet. If you know the IP address that you want to ping, replace *IP address* with it. For example, to ping the IP address 192.168.1.1, type ping 192.168.1.1.
- To have your PC ping itself, type ping 127.0.0.1.
